Corporate Social Responsibility

The best guarantee and way to sustainability and quality is our human capital, our team which is continuously in (e-)motion to develop new skills, to enhance collaboration and to share knowledge. Pursuing sustainability and Quality is an attitude living in our founders hearts from day one. We always strived to join our architectural passion, goals and ambition with being a responsible and caring employer and bring positive impact to society. As one of the first on the Belgian market we work mostly with employees and not only with free lancers. We have been ISO certified since 20 years, follow the Code Buysse 3.0, underwrote the Belgian Architects Declare Charter. One of our cofounders followed CSR training more than 10 years ago. Today we are completing all the formal proofing which we will publish as soon as possible. (UN global compact, UN global Rights, ISO26000 self-declaration) so certificates coming soon !
